

Product specification

Grain from Amuru District, Uganda

Own-farm grain from Amuru — six crops, two seasons, one traceable origin. Normah Agro Farm grows maize, soya beans, rice, sesame, sorghum and millet across two growing seasons on a single mechanised operation at Bana Trading Centre, Amuru District.

Crop specifications

Crop	Season(s)	Planting window	Harvest window	Primary market	Packaging
Maize	A & B	Early in each season	Mid-to-late in each season	Export and regional trade	50 kg woven polypropylene bags

Fields shown as “TBC – verify” are provisional and pending client confirmation; see CONTENT-GAPS.md and data/crops.json in the website handover package.

Planned addition

Wheat is planned as a future crop and is not yet in production.

The farm

Bana Trading Centre, Amuru District

Roughly 90 km west of Gulu town, bordering Adjumani and Nwoya districts, close to the South Sudan border and the Elegu/Nimule crossing.

Under cultivation today	1,000+ acres
Near-term growth plan	Scaling toward 3,000+ acres
Tractors	4
Combine harvesters	2
Grain warehouse	450 sqm
Growing seasons per year	2

Acreage figures are provisional pending client confirmation – see CONTENT-GAPS.md.

Handling chain

1. Field and plot record » 2. Harvest » 3. Cleaning » 4. Drying and moisture check » 5. Grading » 6. Bagging » 7. Warehouse storage » 8. Dispatch documentation

A silo with a processing area, a weighbridge and a washing/grading area are planned additions to this chain and are not yet built. Certification status (UNBS, phytosanitary, aflatoxin testing) is in progress — see the Quality, handling & traceability page for detail.
